	Explanatory Notes	2
1.	Index of Local Government Areas (with population and area), South Australia, 1966	4
2.	Population : Urban Centres (showing local government area components), South Australia, 1961 and 1966 ..	7
3.	Population : Local Government Areas (showing Metropolitan, other urban and rural components), South Australia, 1961 and 1966	9
4.	Population : Urban Centres of over 2,500 population, South Australia, 1961 and 1966	17
5.	Urban Centres : Number and Population in size groups, South Australia, 1961 and 1966	18
	APPENDIX A. Field Count Statements issued	
	APPENDIX B. Outline Map : Adelaide Statistical Division	

This statement contains preliminary results of the Census of 30th June, 1966. The figures have been compiled by field personnel during the taking of the Census and are subject to amendment. The statement excludes particulars of full-blood Aborigines.

Similar information for all States and Territories of Australia is being published progressively. A list of 1966 Field Count Statements issued to date is contained in Appendix A to this statement.

A brief explanatory comment on the procedures used in the delimitation of metropolitan and other urban centres, capital city statistical divisions and statistical districts is contained herein. A detailed description of the procedures is contained in Field Count Statement No. 4.

EXPLANATORY NOTES ON THE DELIMITATION OF URBAN BOUNDARIES FOR STATISTICAL PURPOSES

For the purpose of presenting population and dwelling statistics obtained at the Census of 30th June, 1966, new concepts have been adopted for the delimitation of metropolitan and other urban centres. These are described in detail in Field Count Statement No. 4 - Population : Principal Urban Centres of Australia. Because of practical difficulties (notably lack of time to carry out an extensive examination of each area in order to re-design suitable collector's districts and the absence of suitable topographic boundaries around small towns) the new criteria have at present been uniformly applied only to urban centres within the capital city statistical divisions and the statistical districts, to other urban centres with a population of 30,000 or more and to a few smaller centres (Katoomba-Wentworth Falls, Lawson-Hazelbrook and urban centres in the Shires of Wyong and Gosford in New South Wales; Moe-Yallourn in Victoria; Cairns in Queensland and Kalgoorlie in Western Australia). It is proposed to extend the application of the new criteria to smaller centres in future Censuses.

Briefly the new concepts, which as explained above, have in general only been applied to the larger urban centres, are as follows:-

(i) Population clusters of 1,000 or more persons having a minimum density of 500 persons per square mile shall be designated "Urban". This density shall be determined for each census collector's district (the smallest geographical area available). Additionally, some areas of lower population and/or density shall be classified as "Urban" on other grounds (e.g. holiday areas, industrial areas).

(ii) Around each principal urban centre with a population of 75,000 or more two boundaries shall be drawn. The outer boundary shall circumscribe the area which is expected to be in close economic and social contact with the principal urban centre for the next two or three decades. These areas shall be designated STATISTICAL DIVISIONS (for State capital cities) or STATISTICAL DISTRICTS (for Canberra, Newcastle, Wollongong and Geelong).

The inner boundary shall delimit the principal urban centre itself. It shall be a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. For capital cities, the principal urban centre encompassed by the inner boundary shall be designated the "METROPOLITAN AREA".

(iii) Urban centres of less than 75,000 population shall be described by name as "URBAN _____".

2. For urban centres not yet delimited by the new criteria, the following procedures were used:-

(i) Municipalities, cities, towns and boroughs of over 1,000 population have been classified as urban (except where they contain a very large rural component, in which case the urban centres have been delimited from aerial photographs or by field inspection). Where extensive urban development is known to extend beyond the boundary the extension has been regarded as an integral part of the urban centre and so included.

(ii) Other urban centres have been intensively examined on the most recent aerial photographs available and the boundaries set as closely as possible to the periphery of the built-up area without regard to local government boundaries. The greater availability of recent aerial photographs in 1966 than in 1961 has enabled more meaningful boundaries to be delineated for many small urban centres.

3. Comparable information for the 1961 Census has been prepared using the new concepts although, because 1961 collector's districts were not especially designed for this purpose, some estimations have had to be made.

4. Where, through growth or decline, an urban centre at one Census was non-urban at the other, figures for both Censuses have been shown where available for comparison, the non-urban figure being in brackets.

5. In some instances, urban centres may extend across State boundaries. Examples are Gold Coast which includes Tweed Heads, Albury-Wodonga and a number of smaller urban centres along the River Murray. In such cases, State tables include only that part of the urban centre situated within the State, the population of the whole urban centre being shown in a footnote.

Throughout this statement the following abbreviations have been used:

(C) = City; (T) = Town; (D.C.) = District Council; n.a. = not available.

TABLE 2. - POPULATION : URBAN CENTRES, SOUTH AUSTRALIA, 1961 AND 1966

NOTE. - For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 have been redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 may therefore reflect (i) population changes within the original 1961 boundaries, (ii) urban growth beyond the original boundaries, and (iii) the merging of other urban areas, one with another, or with the Metropolitan Area.

TABLE 2. - POPULATION : URBAN CENTRES, SOUTH AUSTRALIA, 1961 AND 1966 - continued

NOTE. - For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 have been redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 may therefore reflect (i) population changes within the original 1961 boundaries, (ii) urban growth beyond the original boundaries, and (iii) the merging of other urban areas, one with another, or with the Metropolitan Area.

(a) Non-Metropolitan in 1961. (b) Non-Urban in 1961. (c) The 1961 urban centre of Port Noarlunga-Christies Beach has expanded in 1966 to embrace the new urban development at Reynella and Morphett Vale.

NOTE. - Minus sign (-) denotes decrease in population.

TABLE 3. - POPULATION : LOCAL GOVERNMENT AREAS, SOUTH AUSTRALIA, 1961 AND 1966

NOTE. - For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 have been redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 may therefore reflect (i) population changes within the original 1961 boundaries, (ii) urban growth beyond the original boundaries, and (iii) the merging of other urban areas, one with another, or with the Metropolitan Area.

TABLE 3. - POPULATION : LOCAL GOVERNMENT AREAS, SOUTH AUSTRALIA, 1961 AND 1966 - cont'd.

NOTE. - For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 have been redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 may therefore reflect (i) population changes within the original 1961 boundaries, (ii) urban growth beyond the original boundaries, and (iii) the merging of other urban areas, one with another, or with the Metropolitan Area.

		Males	Females	Persons	Numerical	Percentage %
STATE SUMMARY - continued						
TOTAL (URBAN RURAL) -						
Metropolitan Urban	580,449	357,931	368,999	726,930	146,481	25.24
Other Urban	178,227	88,471	85,117	173,588	-4,639	-2.60
Rural	206,726	100,244	88,782	189,026	-17,700	-8.56
Migratory	3,938	1,156	23	1,179	-2,759	-70.06
TOTAL SOUTH AUSTRALIA	969,340	547,802	542,921	1,090,723	121,383	12.52

(a) Merged with Metropolitan Area. (b) Non-Metropolitan in 1961. (c) Indicates those local government areas where a boundary change occurred between the 1961 and 1966 Censuses. In many cases this boundary change resulted in a change in the population of the local government area. In order to eliminate population changes due to boundary changes and to provide a comparison with the 1966 population figures, the 1961 local government area populations shown in the table have been adjusted, where necessary, to the boundaries used in 1966. (d) Non-urban in 1961. (e) Urban in 1966. (f) Non-urban in 1966. (g) Refers to persons not elsewhere included who, at midnight between 30th June, 1966 and 1st July, 1966 were on ships in South Australian waters, or were travelling on long-distance trains, motor coaches or aircraft.

NOTE. - Minus sign (-) denotes decrease in population.

TABLE 4. - POPULATION : URBAN CENTRES OF OVER 2,500 POPULATION, SOUTH AUSTRALIA, 1961 AND 1966

NOTE. - For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 have been redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 may therefore reflect (i) population changes within the original 1961 boundaries, (ii) urban growth beyond the original boundaries, and (iii) the merging of other urban areas, one with another, or with the Metropolitan Area.
